

Wildlife Monitoring

Avison Management Services Ltd. has developed a professional **Dangerous Wildlife Monitoring, Avoidance, and Interaction Program** to serve the needs of Industry. Wildlife Monitors are becoming an essential **safety measure** for crews working in **remote sites**, as well as in and around **camps**. Our team members consist of qualified **First Nations**, Guides, Trappers, Canadian Rangers, Biologists, and other professionals. All are experienced in dealing with potentially dangerous wildlife and are licensed and certified in firearms safety.

Our **training program and protocol** were developed by a Registered Professional Biologist and former area Wildlife Biologist for the Alaska Department of Fish and Game. The program is designed to equip Wildlife Monitors with the skills and tools necessary to promote a safe working environment for the resource workers they protect, while making every effort to avoid conflicts with potentially dangerous wildlife.

To facilitate a safe working environment, Wildlife Monitors:

- educate resource crews on potentially dangerous wildlife avoidance and safety measures.
- assess work sites for the presence of potentially dangerous wildlife.
- take remedial actions to avoid negative wildlife interactions.
- provide immediate intervention to protect crews from dangerous wildlife.

Experience

Dangerous Wildlife Monitoring, Avoidance, and Interaction Program

Our experienced and trained Wildlife Monitors have experience working in multiple areas around BC on mining and gas pipeline projects for a variety of different companies:

- **WorleyParsons Canada Services Ltd.**
Coastal GasLink Gas Transmission Project
- **TERA Environmental Consultants**
Spectra Energy Westcoast Connector Gas Transmission System Project
- **Stantec Consulting Ltd.**
Prince Rupert Gas Transmission Project
- **Aley Corporation**
Taseko Mines Water Sampling Project

Whether your project is large or small, Avison Management Services Ltd. is able to provide professional Wildlife Monitoring services to assure that your crews are safe and protected from dangerous wildlife.

We invite you to contact us directly by phone or email to discuss how we can assist you in the future with your environmental monitoring needs.
